

This guide outlines the process and technical steps and details necessary to implement the PriceWaiter Widget on your BigCommerce webstore.

1 Adding The Widget Code

- Login to your BigCommerce admin panel
- At the top of the page, navigate to "Design"
- In the gray "Current Store Design" box, click "Browse Template Files..."
- From the bottom, left hand frame select "Panels" > "ProductDetails.html"
- Directly after the first HTML `</script>` tag, insert the following code:

```
<!-- Begin PriceWaiter Code -->
<script type="text/javascript"> //
var strPrice = "%GLOBAL_ProductPrice%";
var PriceWaiterOptions = {
  apiKey: 'YOUR API KEY',    // REPLACE "YOUR API KEY" YOUR STORE'S PW API KEY
  product: {
    sku: '%GLOBAL_SKU%',
    name: '%GLOBAL_ProductName%',
    price: parseFloat(strPrice.replace(/[$,]+/g, "")),
    image: ThumbURLs[0]
  },
  button: {
    size: 'sm'                // SEE ONLINE DOCUMENTATION FOR WIDGET OPTIONS TO CHANGE BUTTON DEFAULT STYLE
  },
  onLoad: function() {
    PriceWaiter.originalOpen = PriceWaiter.open;
    PriceWaiter.open = function() {
      //required options
      var attributesValidated = $('#productDetailsAddToCartForm').validate().form();

      if(!attributesValidated) {
        return false;
      }

      //send all options to pricewaiter
      var requiredElements = $('#productDetailsAddToCartForm').validate().currentElements;
      for(var i=0; i &lt; requiredElements.length; i++) {
        var radioSet = document.getElementsByName(requiredElements[i].name);
        for(var j=0; j &lt; radioSet.length; j++) {
          if(radioSet[j].checked) {
            var parentRow = $(radioSet[j]).parents('div.productAttributeRow');
            var name = parentRow.find('span.name').html().trim().replace(/[:]/, "");
            var value = $(radioSet[j]).next().html();
            PriceWaiter.setProductOption(name, value);
            break;
          }
        }
      }
    }
  }

  //grab quantity before opening PW lightbox
  var qty = $('#qty_');
  if(qty.length) {
    var basePrice = parseFloat($('#em.ProductPrice').html().replace(/[$,]+/g, "").trim());
    PriceWaiter.setPrice(basePrice);
    var qtyNum = parseFloat(qty.val());
    PriceWaiter.setQuantity(qtyNum);
  }
  // actually open pricewaiter window
  PriceWaiter.originalOpen();
}
};
//]]&gt;&lt;/script&gt;
&lt;!-- End PriceWaiter Code --&gt;</pre>
</div>
```

1 Adding The Widget Code (continued)

f. Near the end of the page, before the template tag `%%Panel.SimilarProductsByCustomerViews%%`, insert the following code:

```
<!-- Begin PriceWaiter Code -->
<script type="text/javascript">
(function() {
    if(document.getElementById('no_pricewaiter')) {
        return false;
    } else {
        var pw = document.createElement('script');
        pw.type = 'text/javascript';
        pw.src = "https://widget.pricewaiter.com/nyp/script/widget.js";
        pw.async = true;

        var s = document.getElementsByTagName('script')[0];
        s.parentNode.insertBefore(pw, s);
    }
})();
//]]&gt;&lt;/script&gt;
&lt;!-- End PriceWaiter Code --&gt;</pre>
</div>
<div data-bbox="66 452 193 470" data-label="Text">
<p>g. Click "Save"</p>
</div>
<div data-bbox="66 473 732 491" data-label="Text">
<p>h. From the bottom-left hand frame select "Snippets" &gt; "ProductAddToCart.html"</p>
</div>
<div data-bbox="66 493 913 529" data-label="Text">
<p>i. Just after the template tag <code>%%GLOBAL_AddToCartButtonOptimizerNoScriptTag%%</code>, add the following code:</p>
</div>
<div data-bbox="66 550 305 607" data-label="Text">
<pre>&lt;!-- Begin PriceWaiter Widget Button --&gt;
&lt;div&gt;
    &lt;span id="pricewaiter"&gt;&lt;/span&gt;
&lt;/div&gt;
&lt;!-- End PriceWaiter Widget Button --&gt;</pre>
</div>
```

Step one will enable the widget on every product in your store. Follow the steps below to disable the widget on specific products.

2 Disabling the Widget (per product)

For each product that you don't want the Name Your Price widget to appear on, follow these steps.

- a. Go go edit a single product "Products" > "View Products"
- b. In the product description box, click the "HTML" button to edit the HTML Source of the description.
- c. Place the following code anywhere in the box:

```
<!-- Begin Disable PriceWaiter Widget On This Page -->  
<span id="no_pricewaiter" style="display: none;">&nbsp;</span>  
<!-- End Disable PriceWaiter Widget On This Page -->
```

- d. Click "Update" and then save your product.
